PROFILE

Twelve years inside one Lagos retail business — two at the counter and in the stockroom, then warehouse supervision and store management, now running its IT. Self-taught in software: I founded Quira Resources Digital Technology and build Quira Ledger (quiraledger.com), multi-tenant accounting and point-of-sale for Nigerian retailers with more than one outlet. Four production frontends against one NestJS API, schema-per-tenant Postgres, an offline-capable till, and payroll that handles PAYE and pension.

EXPERIENCE

Founder & Full-Stack Developer · Quira Resources Digital Technology

`Dec 2023 — Present`

Lagos · registered company

- Design and build Quira Ledger end to end — four frontends against one NestJS API
- Schema-per-tenant Postgres, Prisma migrations, tenant isolation at the database
- REST APIs, httpOnly token auth, per-tenant roles on top of a three-tier base role
- Everything from the schema to the colour tokens, because there is nobody else yet

IT Support Manager · So Fresh Neighbourhood Market

`Jun 2022 — Present`

Ikeja, Lagos

- Run IT across the branches — servers, VPS, mail, network, security
- Odoo ERP administration and technical support for the business
- Train staff and write the documentation they actually use

IT Software Support Technician · So Fresh Neighbourhood Market

`Feb 2022 — Jun 2022`

Ikeja, Lagos

- Wrote scripts to watch system performance and clear recurring errors
- System upgrades, patching, hardware diagnosis and replacement

Project Officer · So Fresh Neighbourhood Market

`Feb 2021 — Dec 2021`

Ikeja, Lagos

- Documented requirements and processes across departments
- Ran project plans and budgets, reported progress to stakeholders

Earlier roles · So Fresh Neighbourhood Market

2014 – 2017

Retail operations — the reason the software knows what it is for.

- **Retail Store Manager** (2015–2017) — Owned stock accuracy, pricing, discounts and margin for the store
- **Warehouse Supervisor** (2015–2015) — Supervised receiving, stocking and dispatch
- **Storekeeper** (2014–2015) — Received and inspected incoming stock against the paperwork
- **Crew Member** (2014–2014) — Cashiering — payments, change, end-of-day

SELECTED WORK

Quira Ledger · Live

www.quiraledger.com

Multi-tenant accounting and POS for Nigerian retailers running more than one outlet. Each tenant gets its own Postgres schema. The till keeps selling when the internet drops and syncs when it comes back.

- Offline-first till — a sale completes with no connection and reconciles later
- Payroll that knows Nigeria: PAYE bands, 8% employee and 10% employer pension, bank schedules as CSV the portal will actually accept
- Count sheets that measure variance against live stock, not the snapshot taken when the sheet was printed
- General ledger with period close and lock, so last quarter stops moving

`Next 16 · React 19 · TypeScript · NestJS · PostgreSQL · Prisma · Tailwind v4`

So Fresh — IT and infrastructure · Live · ongoing

sofreshng.com

I run IT for the chain as IT Support Manager — the servers, the mail, the network across branches, the Odoo ERP the business runs on, and sofreshng.com along with it. This is the day job, and it is where I find out what retail software gets wrong.

- VPS provisioning and maintenance, patching, uptime
- Mail server and client configuration across the business
- Odoo ERP — deployed, configured and supported in production
- Network and security administration across branches

`Linux · VPS · Odoo · DNS · Mail · Backups`

SKILLS

Languages	TypeScript, JavaScript, SQL, Python, HTML, CSS
Web	Next.js, React, Tailwind CSS, TanStack Query, REST APIs
Backend and data	NestJS, Node.js, Express, PostgreSQL, MongoDB, Prisma, Mongoose
Infrastructure	Linux, VPS, Nginx, DNS, Mail servers, Backups
Business systems	Odoo ERP, Paystack, Flutterwave, POS hardware

EDUCATION

PGD Computer Science — Taraba State University, Jalingo 2026

BSc Industrial Physics — University of Agriculture, Makurdi 2022
